CSCI 360 course is a continuation of CSCI 260. Whereas 260 should have covered the text through pipelining, this course will cover the remaining parts including instruction-level parallelism, memory systems/caching, parallel processing, and several additional topics in modern computer architecture.

Course Outline:

Topics to be covered include:

- Caching (4 weeks)
- Virtual memory (4 weeks)
- Parallelism (2 weeks)
- Amdahl's law and Flynn's taxonomy (4 weeks)
- I/O basics (2 weeks)

Lectures: The lectures will involve both slides and classroom notes. There will both synchronous and asynchronous lectures. Attending the synchronous lectures will be very important for the students to develop the concepts and skills, and also to be able to perform well in the exams, assignments, and quizzes.

Homework: Upto 4 written homework assignments will be assigned throughout the semester. Assignments will be due at the beginning of the lecture on the dates announced. It is your responsibility to keep track of the assignments and their due dates.

Pop Quizzes: There will also be upto 5 unannounced pop quizzes during class hours containing 10-15 multiple choice questions. There will be no retake of the quizzes.

Tests: There will be upto 2 tests. Most test questions will be conceptual and will require a good understanding of the material rather than rote memorization. Thus, you should concentrate on

understanding the concepts and knowing how to apply the material instead of memorizing the textbook.

Grading:

Homework: 20%
Pop quizzes: 30%
Tests: 50%

Makeup Exams: For those having verified reasons to be absent during an exam, makeup exams will be arranged on an individual basis. Please contact me at least 1 week prior to the scheduled test date, as it will not be possible to schedule a makeup "after the fact".

Abuse of Trust: Duplicate homework written in collaboration with others is **NOT** acceptable. Although it is permissible to discuss the homework with others, these discussions should be of a general nature. All work at a detailed level must be done on your own. Students submitting the same or similar solutions to the homework or a student who submits a lab downloaded off the Internet (or obtained from other sources including a compiler) will be considered as having cheated. Any evidence of cheating, copying or collusion, plagiarism, etc., will be graded as zero for all students involved and an automatic F for the course along with sanctions in accordance with Hunter College procedure. The official college statement is:
